

## Creating A Full Colour Back Print For A Trophy

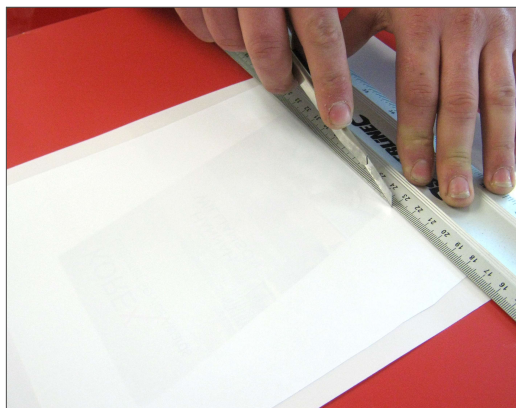

You can put standard sign vinyl on to an acrylic trophy but to make the trophy stand out a little bit more consider making a full colour back print using a colour laser printer.

**1** Mirror your design and print onto **clear laser vinyl**.

**2** Apply white sign vinyl to the printed side using a squeegee.

**3** Cut around design.

**4** Clean the reverse of the acrylic trophy.

**5** Apply design to reverse of trophy.

**6** Your finished trophy.
