

750mm 2 Pack

- 1 Wall Bracket With Left Hand Fold
- 1 Wall Bracket With Right Hand Fold
- 5 750mm Aluminium Bars With End Caps
- 10 Mounting Screws
- 10 Plastic Wall Plugs

1500mm 2 Pack

- 1 Wall Bracket With Left Hand Fold
- 1 Wall Bracket With Right Hand Fold
- 5 1500mm Aluminium Bars With End Caps
- 10 Mounting Screws
- 10 Plastic Wall Plugs

1820mm 2 Pack

- 1 Wall Bracket With Left Hand Fold
- 1 Wall Bracket With Right Hand Fold
- 5 1820mm Aluminium Bars With End Caps
- 10 Mounting Screws
- 10 Plastic Wall Plugs

750mm 4 Pack

- 2 Wall Brackets With Left Hand Fold
- 2 Wall Brackets With Right Hand Fold
- 14 750mm Aluminium Bars With End Caps
- 20 Mounting Screws
- 20 Plastic Wall Plugs

1500mm 4 Pack

- 2 Wall Brackets With Left Hand Fold
- 2 Wall Brackets With Right Hand Fold
- 14 1500mm Aluminium Bars With End Caps
- 20 Mounting Screws
- 20 Plastic Wall Plugs

1820mm 4 Pack

- 2 Wall Brackets With Left Hand Fold
- 2 Wall Brackets With Right Hand Fold
- 14 1820mm Aluminium Bars With End Caps
- 20 Mounting Screws
- 20 Plastic Wall Plugs

750mm Extender Pack

- 1 Wall Bracket
- 4 750mm Aluminium Bars With End Caps
- 5 Mounting Screws
- 5 Plastic Wall Plugs

1500mm Extender Pack

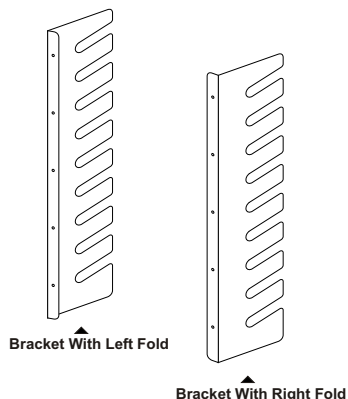

- 1 Wall Bracket
- 4 1500mm Aluminium Bars With End Caps
- 5 Mounting Screws
- 5 Plastic Wall Plugs

1820mm Extender Pack

- 1 Wall Bracket
- 4 1820mm Aluminium Bars With End Caps
- 5 Mounting Screws
- 5 Plastic Wall Plugs

Instructions

There are 2 different types of bracket in the pack.

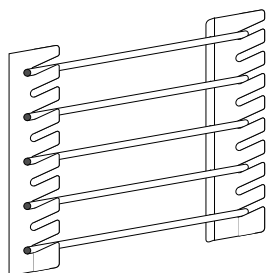

The bracket with the right hand fold is designed to be used on the left and the left hand fold is the bracket for the right hand side so when installed the screw fixings are behind the vinyl rolls.

This kit includes mounting screws and plastic wall plugs for masonry. You will require a **6mm masonry drill bit** (not included).

Example Configuration Of A 2 Bracket Kit

This gives you a minimum storage capacity of 5 full 50 metre rolls of vinyl. By adding more bars (available separately) you can store up to 9 part rolls, depending on the core diameter.

Install the brackets on a suitable wall that is capable of holding the load using the masonry fixings that are included.

In the table below the approximate load weight is calculated on 5 full 50 metre rolls of standard vinyl in the respective size on a 2 bracket installation. If you are extending a 2 bracket installation the load will obviously increase.

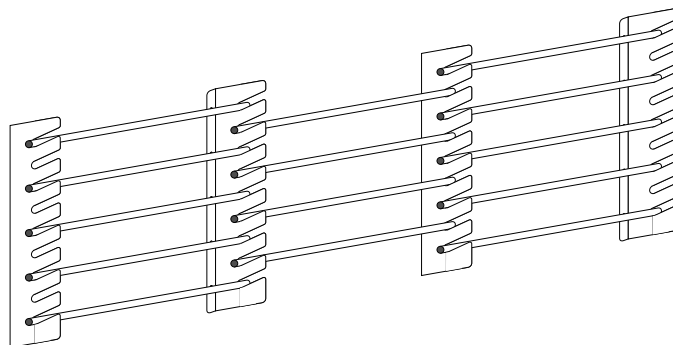

Kit Size	750mm	1550mm	1820mm
Vinyl Roll Width	610mm	1220mm	1524mm
Approximate Load	36Kgs	66Kgs	78Kgs
Distance between brackets*	690-710mm	1380-1420mm	1650-1720mm

Mount one bracket first ensuring that it is vertically and horizontally straight using a spirit level (not included). Then use this as a guide to mount the next bracket ensuring that it is straight and level in relation to the first bracket.

*Distance between bracket is measured from the outer edge to the outer edge (eg. the part of the bracket that holds the vinyl)

Example Configuration Of A 4 Bracket Kit

This gives you a storage capacity of 14 full 50 metre rolls of vinyl.

Remember that with a 4 bracket configuration the load weight will increase proportionally so ensure that the wall is capable of taking the load.
